

## Trayco's solar shelter kits: assemble your PV inverters at lightning speed!

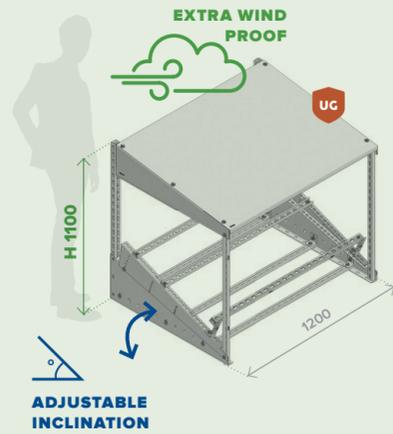

The angled shelter (RSA-1200-UG) is one of Trayco's latest innovations that takes your solar project to the next level. It has the same high-quality basic features as the standard shelter, but is unique in its design. Its compact, low-profile construction with adjustable inclination ensures that this shelter undergoes minimal wind load and requires no ballast\* to ensure installation stability and safety.

### BALLAST STUDY FOR WIND ZONES IN BELGIUM AND THE NETHERLANDS\*

● = No ballast is required   ● = Recommended ballast (kg)   ● = Not safe. Installation is not recommended.

### NEW ANGLED SHELTER | RSA-1200-UG

Dim: H 1100 x W 1200 x L 956 mm

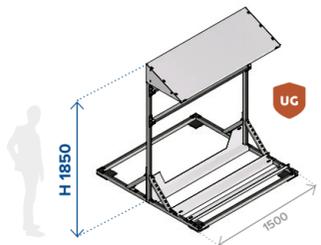

#### THE MANY ADVANTAGES OF THE ANGLED SHELTER

- ✓ Compact
- ✓ Minimal wind load
- ✓ No ballast required\*
- ✓ Adjustable inclination
- ✓ Low-profile construction
- ✓ Roof for protection of the inverter
- ✓ Pre-assembled kit
- ✓ Cable fixing rail

## Superfast and flexible solutions for all your solar projects

Trayco® offers a wide range of support systems and accessories for fast and flexible mounting of solar installations.

Thanks to their high-quality finishing (in UG, DG and CO) these systems can be installed both indoors and in more aggressive outdoor surroundings (e.g. saline). As an installer you significantly save installation time whilst using the **clip-on accessories**. We also know that every project is different. That is why our **extensive collection of coupling pieces and profiles** offers the flexibility your project deserves.

#### VARIOUS APPLICATIONS

Whether it is on the building site, on a wall full of inverters or on a field of solar panels: thanks to Trayco's flexible products you build a tailor-made support structure for your solar project. Contact us for professional advice!

## One support, maximum flexibility

CURIOUS ABOUT THE INSTALLATION OPTIONS? WATCH THE INSTRUCTION VIDEO

With **THE · CUBE** you install cable support systems quickly and safely on flat roofs.

Thanks to its **weight (1 kg)**, you do not need to fix the roof support on the surface. Mesh trays will be installed in no time, without accessories. Or opt for the clip-on fixation plate upon which **two trajectories can be mounted simultaneously. Time-saving guaranteed.**

1 Mounting **with a single twist**. No bolts or nuts required.

2 Coupling of various mesh trays by means of **clip-on fixation plate**. CUBE-FP-MTL60-050-UG.

3 Mounting with **fixation plate** MT-FB-UG.

4 Mounting **cable ladders and mesh trays**.

## Ultra protection against corrosion

Our **ULTRA GALVA** metal coating offers corrosion protection up to class 5 in all kinds of harsh and aggressive conditions
